RUTA DELETE

```
137   router.delete("/del-country/:erase", async (req, res) ⇒ {
138       const {erase} = req.params;
139
140       const findActivity = await Activity.findByPk(erase);
141
142       if (findActivity) {
143           await Activity.destroy(
144               { where: {id: erase}}
145           )
146       return res.send(`se elimino la actividad con el id: ${erase}`)
147       }else{
148           res.send("error pais no existe")
149       }
150
151   })
```

De función asíncrona a promesa

```
4
5     export function getAllCountries() {
6         return async function(dispatch) {
7             let json = await axios.get(`${urlApi}/countries`);
8             return dispatch({
9                 type: "GET_ALL_COUNTRIES",
10                payload: json.data
11            });
12        }
13    };
14    //promesas
15    export function getAllCountries2() {
16        return function(dispatch) {
17            return axios.get(`${urlApi}/countries`)
18            .then(json ⇒ {
19                dispatch({
20                    type: "GET_ALL_COUNTRIES",
21                    payload: json.data
22                })
23            })
24        }
25    }
26
```
